Hans-Peter is a registered patent agent in the intellectual property and technology team.

He focuses on patent prosecution matters in the areas of pharmaceuticals, plastic fibers and coatings, vaccines, medical devices, cosmetics and hygienic compositions.

Hans-Peter has experience in patent prosecution pertaining to both US and international patent applications, including the preparation of appeal briefs. In addition, he provides technical and research knowledge in opinion work and related patent searches and evaluations.

He was previously an assistant professor at Rockefeller University in the areas of basic and cancer research in cell biology, immunology, molecular biology and biochemistry. Hans-Peter was also an instructor and research associate in the Department of Biochemistry at Rutgers Medical School.

A former Adjunct Professor at Cornell Graduate School, he lectured on basic and cancer research in cell biology, immunology, molecular biology and biochemistry.
